ENGINEERING DATA

PRODUCT:	DISCOVERY BALLAST
PRODUCT #:	20145
REVISION:	A
MATERIAL:	304 SERIES STAINLESS STEEL

Discovery Lifeguard Platform Ballast System, part number 20145

The Platform Ballast System shall be designed to allow for attachment to an existing Discovery portable lifeguard platform. The ballast, when filled with water, shall weigh a minimum of 184-pounds and shall provide additional stability to portable lifeguard platforms.

The Platform Ballast System shall consist of the following components:

Ballast Tank

Ballast tank shall be fabricated of Linear Low-Density Polyethylene, employing a UV inhibitor and shall be flame polished and will be Pantone 072 (safety blue) in color. The tank will incorporate molded in graphics, stating "Danger Keep Off" on two sides. The ballast tank will provide with a top-mounted fill port and side mount drain port, each with cover. Both ports shall be molded polyethylene fittings, which shall be friction welded to the ballast tank. Molded-in inserts, located in the bottom of the ballast tank, will be incorporated to allow the ballast tank to be secured to the lifeguard platform.

Mounting Brackets and Hardware

The ballast tank will be attached to two, 1" square x 0.062 wall thickness, square stainless steel tubing. The 1" square tubing will be attached to the portable lifeguard platform. The ends of the square tubing will be close using 1" plugs. Attachment hardware will be 18-8 stainless steel.

Instructions

An instruction manual shall be supplied that provides installation and maintenance instructions for the ballast system.

Warranty

Two year limited warranty.
